

# Muhammad Haizad Annuar Zaini

Programmer | Full-Stack Developer 📍 Shah Alam, Selangor | ☎ 6011 56356208

✉ [haizadannuar@gmail.com](mailto:haizadannuar@gmail.com) |  [github.com/haizad](https://github.com/haizad)  [haizad.is-a.dev](https://haizad.is-a.dev)

## Professional Summary

Dedicated and versatile Programmer with over 6 years of experience in full-stack development, mobile applications, and systems integration. Proven track record in building proprietary web/mobile solutions, managing high-performance REST APIs, and leading technical teams within Agile environments. Experienced in the full software development lifecycle, from UI/UX design to hardware-software integration.

## Technical Skills

| Category         | Skills                                                                                                                                          |
|------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| Programming      | PHP, Dart (Flutter), JavaScript, SQL, C/C++, Python, C# (.NET)                                                                                  |
| AI & Automation  | Gemini CLI, Antigravity IDE                                                                                                                     |
| Frameworks/Tools | Laravel, Docker, Git, Postman, Visual Studio Code, Android Studio, XCode, Trello                                                                |
| Server & Infra   | LAMP Stack (Linux, Apache, MySQL, PHP), LAPP Stack (Linux, Apache, PostgreSQL, PHP), Linux (NGINX/Apache), Firebase Cloud Functions, Cloudflare |
| Design / UI      | UI/UX Design (Figma), Vector Graphics (Inkscape), Wireframing                                                                                   |
| Databases        | MySQL, PostgreSQL, Oracle SQL, Firestore, Firebase Real-time Database                                                                           |

## Professional Experience

### MY IRC Sdn. Bhd. | Serdang, Selangor

Programmer | May 2023 – Present

- **Product Development:** Led the development and maintenance of in-house proprietary web and mobile applications using Agile/Scrum frameworks.
- **Fintech Integration:** Implemented **Payment Gateway APIs** to facilitate seamless in-app transactions.
- **System Integration:** Integrated existing APIs to enhance system functionality and manage backend data using MySQL.
- **API Management:** Built and documented RESTful APIs, ensuring seamless communication between mobile and web platforms.
- **Leadership:** Mentored and managed interns, fostering technical growth and team productivity.

### V.NET Computer Services Sdn. Bhd. | Serdang, Selangor

Programmer | August 2019 – February 2023

- **Full-Stack Development:** Designed, implemented, and maintained iterative features for various software products.
- **Database Architecture:** Designed custom database schemas to meet complex client requirements.
- **Manual Documentation:** Conducted rigorous endpoint testing via Postman and maintained comprehensive API documentation.

### Nine Bytes Engineering | Shah Alam, Selangor

Junior General Assistant / Intern | 2017 – 2019

- **Technical Support:** Performed precision **soldering** for electronic components and assisted in hardware assembly.
- **Quality Control:** Conducted **Factory Acceptance Tests (FAT)** to ensure systems met technical specifications before deployment.
- **Logistics & Admin:** Managed administrative workflows, including the preparation and delivery of **Delivery Orders (DO)** and **Invoices**.
- **IoT & Hardware Setup:** Gained hands-on experience in **setting up and configuring Raspberry Pi** (OS installation) through SD card.

## Key Projects & Achievements

### Email Middleware (C#.NET) | 2026

- **System Function:** Designed and deployed an automated Windows Service to manage mission-critical system alerts via XML-to-SMTP queue processing.
- **AI-Driven Development:** Leveraged **AI** to architect and deploy an enterprise-grade Windows Service in .NET, effectively bridging a cross-stack gap with high-speed prototyping.

### Cashless Solution Project (Proprietary) | 2023 – 2025

- **Role:** Contributed to the development and long-term maintenance of a secure ecosystem.
- **Optimization:** Monitored system performance and addressed technical debt to ensure transaction reliability.

### LED Parking Display Integration | October 2025

- Executed a contract project involving hardware-software data exchange.
- Utilized **MQTT protocol** for data transfer to serial converters via **RS232 and RS485** communication.

### Backend System Development | 2019 – 2025

- Architected RESTful APIs for diverse web and mobile application ecosystems.

### Laravel Migration & Performance | Late 2024

- Managed dependency updates and resolved breaking changes to ensure system compatibility and performance optimization.

### Discount Validator Mobile Application | 2023 – 2024

- Developed a specialized mobile solution for validation processes, including full-stack hosting and server setup.

---

## Open Source & Contributions

- **Laravel Packages | 2021 :** [haizad/laravel-keycloak-admin](#) , [haizad/laravel-auditing](#)

---

## Education

- **Bachelor's Degree in Human Resource Management** UiTM Puncak Alam | 2016
- **Diploma in Business Studies** UiTM Segamat | 2014

---

## Languages

- **Bahasa:** Native/Fluent (Written & Spoken)
- **English:** Professional Working Proficiency
